<i>Foreword</i>	xv
<i>Preface</i>	xvii
<i>Acknowledgements</i>	xix
1 Introduction	1
What this book is about	1
The scope of tourism	2
The importance of tourism demand forecasting	4
Alternative views of the future	5
Forecasting definitions	7
Other definitions	7
Uses of tourism demand forecasts	8
Consequences of poor forecasting	9
Special difficulties in tourism demand forecasting	10
Organization of this book	14
For further information	15
World Tourism Organization publications	16
Notes	16
2 Alternative forecasting methods and evaluation	17
Types of forecasting methods	17
Forecasting methods and models	19
Forecasting model evaluation criteria	19
Forecast measures of accuracy	21
Error magnitude accuracy	21
Mean absolute percentage error	22
Root mean square percentage error	24
Directional change accuracy	24
Trend change accuracy	27
Value of graphical data displays	29
Computer software	31
Assessing data quality	32
Missing data	32
Discontinuous series	32

Data anomalies	33
Number of data points	34
Data precision	34
Reasonable data	35
Sound data collection	35
Summary	36
For further information	37
3 The tourism forecasting process	38
The forecasting process	38
The design phase	39
The specification phase	44
The implementation phase	46
The evaluation phase	47
Summary	48
For further information	48
4 Basic extrapolative models and decomposition	50
Patterns in time series	51
Seasonal patterns	54
Other data patterns	56
Time series forecasting methods	56
The naive forecasting method	57
Single moving average	57
Decomposition	59
Applications	73
Conclusion	74
For further information	75
Note	75
5 Intermediate extrapolative methods	76
Single exponential smoothing	77
Double exponential smoothing	81
Applications of DES	83
The autoregressive method	84
Comparing alternative time series models	86
Choosing a time series method	89
Summary	94
For further information	95
6 An advanced extrapolative method	96
The Box–Jenkins approach	96
Preparation phase	97
Stationarity of the mean	97
Stationarity of the variance	99
Seasonality	101

Identification phase	106
Autoregressive models	107
Moving average models	107
Procedures for identifying the appropriate model	108
Identifying the appropriate room-demand ARMA model	110
Identification phase summary	112
Estimation phase	114
Diagnostic checking phase	117
Forecasting phase	119
Applications	121
Conclusion	121
For further information	122
Notes	123
7 Causal methods – regression analysis	124
Linear regression analysis	124
Advantages of regression analysis	125
Limitations of regression analysis	125
The logic of regression analysis	126
Simple regression: linear time trend	127
Non-linear time trends	130
Multiple linear regression	132
1. Draft your theory	133
Forecasting Washington, D.C. tourism demand	140
Dummy variables	140
Resistance factors	141
2. Obtain relevant time series	141
3. Identify any multicollinearity	142
4. Specify expected relationships	146
5. Identify initial model	149
6. Evaluate the model's validity	151
7. Assess the model's significance	152
A. Accurate simulation of the historical series	153
B. Validity of the test for simulation accuracy	155
Heteroscedasticity	156
C. Irrelevant explanatory variables	158
D. Omitted explanatory variables	159
E. Stability of the forecasting model	160
8. Use the model to forecast	162
Applications	163
Conclusion	168
For further information	170
Notes	171

8 Causal methods – structural models	172
A tourism demand structural model	174
Advantages and disadvantages	175
The estimation process	176
Applications	177
Conclusion	178
For further information	178
9 Qualitative forecasting methods	180
Occasions for qualitative methods	181
Advantages and disadvantages	182
Jury of executive opinion	182
Applications of the jury of executive opinion	184
Subjective probability assessment	184
Delphi method	187
1. Select the judges	187
2. Pose the questions to the judges	188
3. Ask for answers	189
Summarizing consensus: median or mean?	192
4. Obtain the forecast	193
Delphi advantages and disadvantages	194
Applications of the Delphi method	195
The consumer intentions survey	196
Applications of the consumer intentions survey to tourism	197
Evaluation of tourism consumer intentions surveys	200
Conclusion	202
For further information	203
10 Conclusion	205
Monitoring your forecasts	205
What we have learned about tourism demand forecasting	207
Doing sound forecasting	210
Using forecasts wisely	211
A final word	211
For further information	212
Appendix 1 Hotel/motel room demand in the Washington, D.C., metropolitan area, 1987-94	213
Appendix 2 Dealing with super-annual events	215
Appendix 3 Splicing a forecast to a time series	219
<i>Glossary</i>	223
<i>Bibliography</i>	233
<i>Index</i>	239
