Contents

Preface **xiii**

Part I Introduction and Fundamentals

Chapter 1
Introduction **3**
1.1 What Is an Economic Model? **3**
1.2 How to Use This Book **8**
1.3 Conclusion **9**

Chapter 2
Review of Fundamentals **11**
2.1 Sets and Subsets **11**
2.2 Numbers **23**
2.3 Some Properties of Point Sets in $\mathbb{R}^n$ **31**
2.4 Functions **41**

Chapter 3
Sequences, Series, and Limits **61**
3.1 Definition of a Sequence **61**
3.2 Limit of a Sequence **65**
3.3 Present-Value Calculations **69**
3.4 Properties of Sequences **79**
3.5 Series **84**

Part II Univariate Calculus and Optimization

Chapter 4
Continuity of Functions **103**
4.1 Continuity of a Function of One Variable **103**
4.2 Economic Applications of Continuous and Discontinuous Functions **11**

Chapter 5
The Derivative and Differential for Functions of One Variable **127**
5.1 Definition of a Tangent Line **127**
5.2 Definition of the Derivative and the Differential **134**
5.3 Conditions for Differentiability **141**
5.4 Rules of Differentiation **147**
5.5 Higher Order Derivatives: Concavity and Convexity of a Function **175**
5.6 Taylor Series Formula and the Mean-Value Theorem **185**

Chapter 6
Optimization of Functions of One Variable **195**
6.1 Necessary Conditions for Unconstrained Maxima and Minima **196**
6.2 Second-Order Conditions **211**
6.3 Optimization over an Interval **220**

Part III Linear Algebra

Chapter 7
Systems of Linear Equations **235**
7.1 Solving Systems of Linear Equations **236**
7.2 Linear Systems in n-Variables **250**

Chapter 8
Matrices **267**
8.1 General Notation **267**
8.2 Basic Matrix Operations **273**
8.3 Matrix Transposition **288**
8.4 Some Special Matrices **293**

Chapter 9
Determinants and the Inverse Matrix **301**
9.1 Defining the Inverse **301**
9.2 Obtaining the Determinant and Inverse of a 3×3 Matrix **318**
9.3 The Inverse of an $n \times n$ Matrix and Its Properties **324**
9.4 Cramer's Rule **329**

Chapter 10
Some Advanced Topics in Linear Algebra **347**
10.1 Vector Spaces **347**
10.2 The Eigenvalue Problem **363**
10.3 Quadratic Forms **378**

Part IV Multivariate Calculus

Chapter 11
Calculus for Functions of *n*-Variables **393**
11.1 Partial Differentiation **393**
11.2 Second-Order Partial Derivatives **407**
11.3 The First-Order Total Differential **415**
11.4 Curvature Properties: Concavity and Convexity **436**
11.5 More Properties of Functions with Economic Applications **451**
11.6 Taylor Series Expansion* **464**

Chapter 12
Optimization of Functions of *n*-Variables **473**
12.1 First-Order Conditions **474**
12.2 Second-Order Conditions **484**
12.3 Direct Restrictions on Variables **491**

Chapter 13
Constrained Optimization **503**
13.1 Constrained Problems and Approaches to Solutions **504**
13.2 Second-Order Conditions for Constrained Optimization **516**
13.3 Existence, Uniqueness, and Characterization of Solutions **520**

Chapter 14
Comparative Statics **529**
14.1 Introduction to Comparative Statics **529**
14.2 General Comparative-Statics Analysis **540**
14.3 The Envelope Theorem **554**

Chapter 15
Concave Programming and the Kuhn-Tucker Conditions **567**
15.1 The Concave-Programming Problem **567**
15.2 Many Variables and Constraints **575**

Part V Integration and Dynamic Methods

Chapter 16
Integration **585**
16.1 The Indefinite Integral **585**
16.2 The Riemann (Definite) Integral **593**
16.3 Properties of Integrals **605**

16.4 Improper Integrals **613**
16.5 Techniques of Integration **623**

Chapter 17
An Introduction to Mathematics for Economic Dynamics **633**
17.1 Modeling Time **634**

Chapter 18
Linear, First-Order Difference Equations **643**
18.1 Linear, First-Order, Autonomous Difference Equations **643**
18.2 The General, Linear, First-Order Difference Equation **656**

Chapter 19
Nonlinear, First-Order Difference Equations **665**
19.1 The Phase Diagram and Qualitative Analysis **665**
19.2 Cycles and Chaos **673**

Chapter 20
Linear, Second-Order Difference Equations **681**
20.1 The Linear, Autonomous, Second-Order Difference Equation **681**
20.2 The Linear, Second-Order Difference Equation with a Variable Term **708**

Chapter 21
Linear, First-Order Differential Equations **715**
21.1 Autonomous Equations **715**
21.2 Nonautonomous Equations **731**

Chapter 22
Nonlinear, First-Order Differential Equations **739**
22.1 Autonomous Equations and Qualitative Analysis **739**
22.2 Two Special Forms of Nonlinear, First-Order Differential Equations **748**

Chapter 23
Linear, Second-Order Differential Equations **753**
23.1 The Linear, Autonomous, Second-Order Differential Equation **753**
23.2 The Linear, Second-Order Differential Equation with a Variable Term **772**

Chapter 24
Simultaneous Systems of Differential and Difference Equations **781**
24.1 Linear Differential Equation Systems **781**
24.2 Stability Analysis and Linear Phase Diagrams **803**
24.3 Systems of Linear Difference Equations **825**

Chapter 25
Optimal Control Theory **845**
25.1 The Maximum Principle **848**
25.2 Optimization Problems Involving Discounting **860**
25.3 Alternative Boundary Conditions on $x(T)$ **872**
25.4 Infinite–Time Horizon Problems **886**
25.5 Constraints on the Control Variable **899**
25.6 Free-Terminal-Time Problems (T Free) **909**

Answers **921**
Index **953**
