

Monetary Theory and Policy

Second Edition

Carl E. Walsh

The MIT Press
Cambridge, Massachusetts
London, England

Contents

Preface	xvii
Introduction	1
1 Empirical Evidence on Money, Prices, and Output	9
1.1 Introduction	9
1.2 Some Basic Correlations	9
1.2.1 Long-Run Relationships	9
1.2.2 Short-Run Relationships	12
1.3 Estimating the Effect of Money on Output	15
1.3.1 The Evidence of Friedman and Schwartz	15
1.3.2 Granger Causality	20
1.3.3 Policy Uses	21
1.3.4 The VAR Approach	24
1.3.5 Structural Econometric Models	35
1.3.6 Alternative Approaches	37
1.4 Summary	40
2 Money-in-the-Utility Function	43
2.1 Introduction	43
2.2 The Basic MIU Model	45
2.2.1 Steady-State Equilibrium	51
2.2.2 The Interest Elasticity of Money Demand	56
2.2.3 Limitations	59
2.3 The Welfare Cost of Inflation	59
2.4 Extensions	64
2.4.1 Interest on Money	64
2.4.2 Nonsuperneutrality	65
2.5 Dynamics in an MIU Model	67
2.5.1 The Steady State	70
2.5.2 The Linear Approximation	72
2.5.3 Calibration	74
2.5.4 Simulation Results	76
2.6 Summary	80
2.7 Appendix: Solving for the Dynamics in the MIU Model	80
2.7.1 The Decision Problem	80
2.7.2 Functional Forms	83

2.7.3	The Steady State	84
2.7.4	The Linear Approximation	85
2.7.5	Solving Linear Rational Expectations Models with Forward-Looking Variables	88
2.8	Problems	90
3	Money and Transactions	95
3.1	Introduction	95
3.2	Shopping Time Models	96
3.3	CIA Models	100
3.3.1	The Certainty Case	101
3.3.2	A Stochastic CIA Model	111
3.4	Other Approaches	118
3.4.1	Real Resource Costs	118
3.4.2	Search	120
3.5	Summary	126
3.6	Appendix: The CIA Approximation	127
3.6.1	The Basic Decision Problem	127
3.6.2	The Steady State	129
3.6.3	The Linear Approximation	130
3.7	Problems	131
4	Money and Public Finance	135
4.1	Introduction	135
4.2	Budget Accounting	136
4.2.1	Intertemporal Budget Balance	141
4.3	Money and Fiscal Policy Frameworks	144
4.3.1	Fiscal Dominance, Deficits, and Inflation	145
4.3.2	The Fiscal Theory of the Price Level	164
4.4	Optimal Taxation and Seigniorage	172
4.4.1	A Partial Equilibrium Model	173
4.4.2	Optimal Seigniorage and Temporary Shocks	177
4.4.3	Friedman's Rule Revisited	178
4.5	Nonindexed Tax Systems	192
4.6	Summary	194
4.7	Problems	195

5	Money, Output, and Inflation in the Short Run	199
5.1	Introduction	199
5.2	Flexible Prices	200
5.2.1	Imperfect Information	200
5.2.2	Limited Participation and Liquidity Effects	208
5.3	Nominal Rigidities	211
5.3.1	Wage Rigidity in an MIU Model	211
5.3.2	Imperfect Competition and Price Stickiness	216
5.3.3	Inflation Persistence	223
5.4	A New Keynesian Model for Monetary Analysis	230
5.4.1	The Basic Model	232
5.4.2	Evaluating the New Keynesian Inflation Adjustment Equation	240
5.4.3	General Equilibrium	244
5.5	Sticky Wages and Prices	254
5.6	Summary	255
5.7	Appendix	256
5.7.1	An Imperfect-Information Model	256
5.7.2	A Sticky-Wage MIU Model	261
5.7.3	The New Keynesian Phillips Curve	263
5.8	Problems	266
6	Money and the Open Economy	269
6.1	Introduction	269
6.2	The Obstfeld-Rogoff Two-Country Model	270
6.2.1	The Linear Approximation	274
6.2.2	Equilibrium with Flexible Prices	275
6.2.3	Sticky Prices	282
6.3	Policy Coordination	287
6.3.1	The Basic Model	288
6.3.2	Equilibrium with Coordination	292
6.3.3	Equilibrium Without Coordination	293
6.4	The Small Open Economy	297
6.4.1	Flexible Exchange Rates	299
6.4.2	Fixed Exchange Rates	303
6.5	Open-Economy Models with Optimizing Agents and Nominal Rigidities	305

6.5.1	A Basic Open-Economy Model	305
6.5.2	The Flexible-Price Equilibrium	309
6.5.3	Deviations from the Flexible-Price Equilibrium	310
6.5.4	Extensions	312
6.6	Summary	314
6.7	Appendix	315
6.7.1	The Obstfeld-Rogoff Model	315
6.7.2	The Small Open-Economy Model	318
6.8	Problems	319
7	The Credit Channel of Monetary Policy	323
7.1	Introduction	323
7.2	Imperfect Information in Credit Markets	326
7.2.1	Adverse Selection	327
7.2.2	Moral Hazard	331
7.2.3	Monitoring Costs	332
7.2.4	Agency Costs	337
7.3	Macroeconomic Implications	340
7.3.1	A Simple Model with Bank Loans	340
7.3.2	General Equilibrium Models	345
7.3.3	Agency Costs and General Equilibrium	351
7.3.4	Agency Costs and Sticky Prices	354
7.4	Does Credit Matter?	356
7.4.1	The Bank Lending Channel	357
7.4.2	The Broad Credit Channel	360
7.5	Summary	361
8	Discretionary Policy and Time Inconsistency	363
8.1	Introduction	363
8.2	Inflation Under Discretionary Policy	365
8.2.1	Policy Objectives	365
8.2.2	The Economy	368
8.2.3	Equilibrium Inflation	370
8.3	Solutions to the Inflation Bias	378
8.3.1	Reputation	379
8.3.2	Preferences	393

8.3.3	Contracts	397
8.3.4	Institutions	403
8.3.5	Targeting Rules	405
8.4	Is the Inflation Bias Important?	412
8.5	Do Central Banking Institutions Matter?	419
8.6	Summary	425
8.7	Problems	425
9	Monetary-Policy Operating Procedures	429
9.1	Introduction	429
9.2	From Instruments to Goals	430
9.3	The Instrument Choice Problem	431
9.3.1	Poole's Analysis	432
9.3.2	Policy Rules and Information	436
9.3.3	Intermediate Targets	439
9.3.4	Real Effects of Operating Procedures	447
9.4	Operating Procedures and Policy Measures	448
9.4.1	Money Multipliers	449
9.4.2	The Reserve Market	451
9.4.3	Reserve Market Responses	458
9.4.4	A Brief History of Fed Operating Procedures	462
9.4.5	Other Countries	469
9.5	Problems	471
10	Interest Rates and Monetary Policy	473
10.1	Introduction	473
10.2	Interest-Rate Rules and the Price Level	474
10.2.1	Price-Level Determinacy	474
10.2.2	Interest-Rate Policies in General Equilibrium	480
10.2.3	Liquidity Traps	484
10.3	The Term Structure of Interest Rates	488
10.3.1	The Expectations Theory of the Term Structure	489
10.3.2	Policy and the Term Structure	491
10.3.3	Expected Inflation and the Term Structure	496
10.4	Simple Models for Policy Analysis	499
10.4.1	A Closed-Economy Model	500

10.4.2	Optimal Policy	508
10.4.3	An Open-Economy Model	512
10.5	Summary	514
10.6	Problems	515
11	Policy Analysis in New Keynesian Models	517
11.1	The Basic New Keynesian Model	517
11.2	Policy Objectives	518
11.3	Optimal Commitment and Discretion	523
11.3.1	Commitment	524
11.3.2	Discretion	526
11.3.3	Discretion Versus Commitment	527
11.3.4	Commitment to a Rule	529
11.3.5	Policy Trade-offs Under Discretion	531
11.3.6	Model Uncertainty	533
11.3.7	Endogenous Persistence	536
11.4	Extensions to the Open Economy	539
11.5	Targeting Regimes and Instrument Rules	540
11.5.1	Inflation Targeting	541
11.5.2	Other Targeting Regimes	545
11.5.3	Instrument Rules	546
11.6	Appendix	550
11.6.1	Approximating Utility	550
11.6.2	Solving for Optimal Policy	555
11.7	Problems	556
	References	559
	Name Index	593
	Subject Index	601

Figures

1.1:	Dynamic Correlations, GDP_t and M_{t+j} : 1967:1–2000:4	12
1.2:	Dynamic Correlations, Output, Prices, and Interest Rates: 1967:1–2000:4	14
1.3:	Detrended Money and Real GDP	16
1.4:	Interest Rates and Detrended Real GDP	18
1.5:	Output and Price Response to a Funds-Rate Shock (1965–2001)	31
1.6:	Output and Price Response to a Funds-Rate Shock (1965–1979)	32
2.1:	Steady-State Real Balances (Separable Utility)	56
2.2:	The Welfare Costs of Inflation	61
2.3:	Output and Labor Responses to a Money Growth Shock	78
2.4:	Nominal Interest Rate and Inflation Response to a Money Growth Shock	79
3.1:	Output and Labor Response to a Money Growth Shock	118
3.2:	Nominal Interest Rate and Inflation Response to a Money Growth Shock	119
4.1:	Seigniorage as a Function of Inflation	158
4.2:	Money Growth and Seigniorage Revenue	160
4.3:	Equilibrium with a Fixed Nominal Money Supply	167
4.4:	U.S. Deficits and Seigniorage 1909–1986 (as a percentage of GDP)	177
5.1:	The Effects of a Money Shock with Staggered Price Adjustment	222
5.2:	Change in Inflation Versus Unemployment (1960–1998)	241
5.3:	Output, Inflation, and Real Interest Rate Responses to a Policy Shock in the New Keynesian Model	248
6.1:	Nominal Exchange Rate Response to a Monetary Shock	301
7.1:	Expected Loan Profit with Adverse Selection	330
8.1:	Equilibrium Inflation Under Discretion (Linear Objective Function)	372
8.2:	Equilibrium Inflation Under Discretion (Quadratic Loss Function)	374
8.3:	Temptation and Enforcement	381
8.4:	The Optimal Degree of Conservatism	395
8.5:	Average Inflation Versus Central Bank Independence	420
9.1:	The Reserves Market	459
9.2:	The Reserves Market Response to a Reserve Demand Increase	460

9.3:	Federal Funds Rate, 1965–2001	465
10.1:	The Dynamics of a Liquidity Trap	486
10.2:	Short- and Long-Term Interest Rates: 1967–2001	497
10.3:	Response to a Policy Shock (Baseline Parameters)	505
10.4:	Output Response to a Demand Shock Under Alternative Policy Rules	506
10.5:	Inflation Response to a Demand Shock Under Alternative Policy Rules	507
10.6:	Inflation Coefficient in the Interest Rate Rule	511
10.7:	Response to a Home Policy Shock	513
10.8:	Response to a Foreign Policy Shock	514
11.1:	Output Gap Response to a Cost Shock: Timeless Precommitment and Pure Discretion	528
11.2:	Response of Inflation to a Cost Shock: Timeless Precommitment and Pure Discretion	529
11.3:	Equilibrium Output Gap and Inflation Under Discretion	532
11.4:	The Efficiency Frontier Under Discretion and the Social Marginal Rate of Substitution Between σ_π^2 and σ_x^2	533
11.5:	Responses to a Cost Shock with Endogenous Persistence ($\phi = 0.5$)	539

Tables

2.1:	Steady-State Values	70
2.2:	Baseline Parameter Values	75
2.3:	Steady-State Values at Baseline Parameter Values	75
2.4:	Implied Contemporaneous Correlations	76
2.5:	Effects of the Money Process: $\gamma = 0.5$	77
3.1:	Baseline Parameters	116
3.2:	Effects of the Money Process ($\gamma = 0.5$)	117
8.1:	Central Bank Independence and Inflation	421
9.1:	Parameters Under Alternative Operating Procedures	457
9.2:	Response to a Positive Reserve Demand Shock	461
9.3:	Response to a Positive Shock to Borrowed Reserves	462
10.1:	Parameter Values (Baseline Case)	504
