
MICROECONOMICS OF BANKING

Xavier Freixas

Jean-Charles Rochet

The MIT Press
Cambridge, Massachusetts
London, England

Contents

Figures	xv	
Preface	xvii	
1	General Introduction	1
1.1	What Is a Bank, and What Do Banks Do?	1
1.1.1	Liquidity and Payment Services	2
1.1.2	Asset Transformation	4
1.1.3	Managing Risk	5
1.1.4	Monitoring and Information Processing	7
1.1.5	The Role of Banks in the Resource Allocation Process	7
1.2	Banking in General Equilibrium Theory	8
1.2.1	The Consumer	9
1.2.2	The Firm	9
1.2.3	The Bank	10
1.2.4	General Equilibrium	10
	Notes	11
	References	12
2	Why Do Financial Intermediaries Exist?	15
2.1	Transaction Costs	18
2.1.1	Economies of Scope	18
2.1.2	Economies of Scale	19
2.2	Liquidity Insurance	20
2.2.1	The Model	20
2.2.2	Autarky	21
2.2.3	Market Economy	21
2.2.4	Optimal Allocation	22
2.2.5	Financial Intermediation	23
2.3	Information Sharing Coalitions	23
2.3.1	A Basic Model of Capital Markets with Adverse Selection	24
2.3.2	Signaling Through Self-Financing	25
2.3.3	Coalitions of Borrowers	27
2.3.4	Related Justifications of FIs with Asymmetric Information	27
2.4	Financial Intermediation as Delegated Monitoring	29
2.5	Coexistence of Direct and Intermediated Lending	32
2.5.1	A Simple Model of the Credit Market with Moral Hazard	33
2.5.2	Monitoring and Reputation (Adapted from Diamond 1991)	35

	2.5.3	Monitoring and Capital (Adapted from Holmström and Tirole 1993)	37
	2.5.4	Related Contributions	39
2.6		Problems	41
	2.6.1	Economies of Scale in Information Production	41
	2.6.2	Monitoring as a Public Good and Gresham's Law	41
	2.6.3	Intermediation and Search Costs (Adapted from Gehrig 1993)	42
2.7		Solutions	43
	2.7.1	Economies of Scale in Information Production	43
	2.7.2	Monitoring as a Public Good and Gresham's Law	44
	2.7.3	Intermediation and Search Costs	45
		Notes	47
		References	48
3		The Industrial Organization Approach to Banking	51
	3.1	A Model of Perfect Competition in the Banking Sector	51
		3.1.1 The Model	51
		3.1.2 The Standard Approach: The Credit Multiplier	53
		3.1.3 The Behavior of Individual Banks in a Competitive Banking Sector	54
		3.1.4 The Competitive Equilibrium of the Banking Sector	55
	3.2	The Monti-Klein Model of a Monopolistic Bank	57
		3.2.1 The Original Model	57
		3.2.2 The Oligopolistic Version	59
		3.2.3 Empirical Evidence	61
	3.3	Analyzing the Impact of Deposit Rate Regulations	61
	3.4	Double Bertrand Competition	64
	3.5	Monopolistic Competition	67
		3.5.1 Does Free Competition Lead to the Optimal Number of Banks?	68
		3.5.2 The Impact of Deposit Rate Regulation on Credit Rates	70
		3.5.3 Bank Network Compatibility	73
	3.6	Branch versus Unitary Banking	73
	3.7	Appendix 1: Empirical Evidence	75
	3.8	Appendix 2 : Measuring the Activity of Banks	77
		3.8.1 The Production Approach	77
		3.8.2 The Intermediation Approach	78
		3.8.3 The Modern Approach	79

3.9	Problems	81
3.9.1	Extension of the Monti-Klein Model to the Case of Risky Loans (Adapted from Dermine 1986)	81
3.9.2	Compatibility between Banking Networks (Adapted from Matutes and Padilla 1994)	81
3.10	Solutions	83
3.10.1	Extension of the Monti-Klein Model to the Case of Risky Loans	83
3.10.2	Compatibility between Banking Networks	84
	Notes	85
	References	87
4	The Lender-Borrower Relationship	91
4.1	Why Risk Sharing Does Not Explain All the Features of Bank Loans	92
4.1.1	Optimal Contracts When Cash Flows Are Observable	92
4.1.2	Extensions and Applications of the Risk-Sharing Paradigm	94
4.2	Costly State Verification	95
4.2.1	Incentive Compatible Contracts	96
4.2.2	Efficient Incentive Compatible Contracts	96
4.2.3	Efficient Falsification-Proof Contracts	98
4.2.4	Dynamic Debt Contracts with Costly State Verification	99
4.3	Incentives to Repay	101
4.3.1	Threat of Termination	101
4.3.2	Strategic Debt Repayment: The Case of a Sovereign Debtor	102
4.3.3	Private Debtors and the Inalienability of Human Capital	106
4.4	Moral Hazard	108
4.5	The Incomplete Contract Approach	111
4.5.1	Delegated Renegotiation	112
4.5.2	The Efficiency of Bank Loan Covenants	114
4.6	Collateral and Loan Size as Devices for Screening Heterogenous Borrowers	118
4.6.1	The Role of Collateral	119
4.6.2	Loans with Variable Size	122
4.7	Problems	123
4.7.1	Optimal Risk Sharing with Symmetric Information	123
4.7.2	Optimal Debt Contracts with Moral Hazard (Adapted from Innes 1987)	124

4.7.3	The Optimality of Stochastic Auditing Schemes	125
4.7.4	The Role of Hard Claims in Constraining Management (Adapted from Hart and Moore 1995)	125
4.7.5	Collateral and Rationing (Adapted from Besanko and Thakor 1987)	126
4.7.6	Securitization (Adapted from Greenbaum and Thakor 1987)	126
4.8	Solutions	127
4.8.1	Optimal Risk Sharing with Symmetric Information	127
4.8.2	Optimal Debt Contracts with Moral Hazard	128
4.8.3	The Optimality of Stochastic Auditing Schemes	128
4.8.4	The Role of Hard Claims in Constraining Management	129
4.8.5	Collateral and Rationing	129
4.8.6	Securitization	131
	Notes	131
	References	133
5	Equilibrium and Rationing in the Credit Market	137
5.1	Definition of Equilibrium Credit Rationing	137
5.2	The Backward Bending Supply of Credit	139
5.3	How Adverse Selection Can Lead to a Backward Bending Supply of Credit	140
5.3.1	The Model of Stiglitz and Weiss (1981)	141
5.3.2	Risk Characteristics of Loan Applicants	141
5.4	Collateral as a Sorting Device	144
5.5	Credit Rationing Due to Moral Hazard	148
5.5.1	Nonobservable Technology Choice	148
5.5.2	Nonobservable Capacity to Repay	150
5.6	Problems	151
5.6.1	The Model of Mankiw (1986)	151
5.6.2	Efficient Credit Rationing (Adapted from De Meza and Webb 1992)	151
5.6.3	Too Much Investment (Adapted from De Meza and Webb 1987)	152
5.7	Solutions	153
5.7.1	The Model of Mankiw (1986)	153
5.7.2	Efficient Credit Rationing	153
5.7.3	Too Much Investment	154
	Notes	155
	References	156

6	The Macroeconomic Consequences of Financial Imperfections	159
6.1	A Short Historical Perspective	159
6.2	The Transmission Channels of Monetary Policy	160
6.2.1	The Money Channel	161
6.2.2	Credit View	163
6.2.3	Credit View versus Money View: Relevance of the Assumptions and Empirical Evidence	165
6.2.4	Endogenous Money	167
6.3	The Fragility of the Financial System	169
6.3.1	Financial Collapse Due to Adverse Selection	169
6.3.2	Financial Fragility and Economic Performance	171
6.4	Financial Cycles and Fluctuations	176
6.4.1	Bankruptcy Constraints	177
6.4.2	Credit Cycles	180
6.5	The Real Effects of Financial Intermediation	183
6.6	Financial Structure and Economic Development	185
	Notes	186
	References	187
7	Individual Bank Runs and Systemic Risk	191
7.1	Banking Deposits and Liquidity Insurance	192
7.1.1	A Model of Liquidity Insurance	192
7.1.2	Autarky	192
7.1.3	The Allocation Obtained When a Financial Market Is Opened	193
7.1.4	The Optimal (Symmetric) Allocation	193
7.2	A Fractional Reserve Banking System	194
7.3	The Stability of the Fractional Reserve System and Alternative Institutional Arrangements	195
7.3.1	The Causes of Instability	195
7.3.2	A First Remedy to Instability: Narrow Banking	196
7.3.3	Regulatory Responses: Suspension of Convertibility or Deposit Insurance	197
7.3.4	Jacklin's Proposal: Equity versus Deposits	198
7.4	Efficient Bank Runs	200
7.5	Interbank Markets and the Management of Idiosyncratic Liquidity Shocks	202
7.5.1	The Model of Bhattacharya and Gale (1987)	202
7.5.2	The Role of the Interbank Market	203
7.5.3	The Case of Unobservable Liquidity Shocks	203

7.6	Aggregate Liquidity Shocks	204
7.6.1	The Model of Hellwig (1994)	204
7.6.2	Efficient Risk Allocation	205
7.6.3	Second Best Allocations under Asymmetric Information	206
7.7	Systemic Risk and the Lender of Last Resort: A Historical Perspective	207
7.7.1	Four Views on the LLR Role	207
7.7.2	The Effect of LLR and Other Partial Arrangements	208
7.7.3	The Moral Hazard Issue	210
7.8	Problems	210
7.8.1	Different Specifications of Preferences in the Diamond-Dybvig Model	210
7.8.2	Information-Based Bank Runs (Adapted from Postlewaite and Vives 1987)	211
7.8.3	Banks' Suspension of Convertibility (Adapted from Gorton 1985)	211
7.9	Solutions	212
7.9.1	Different Specifications of Preferences in the Diamond-Dybvig Model	212
7.9.2	Information-Based Bank Runs	214
7.9.3	Banks' Suspension of Convertibility	214
	Notes	216
	References	217
8	Managing Risks in the Banking Firm	221
8.1	Default Risks	221
8.1.1	Institutional Context	221
8.1.2	Evaluating the Cost of Default Risks	222
8.1.3	Extensions	226
8.2	Liquidity Risk	227
8.2.1	Reserve Management	228
8.2.2	Introducing Liquidity Risk in the Monti-Klein Model	229
8.2.3	The Bank as a Market Maker	231
8.3	Market Risk	234
8.3.1	Modern Portfolio Theory: The Capital Asset Pricing Model	234
8.3.2	The Bank as a Portfolio Manager: The Pyle (1971), Hart-Jaffee (1974) Approach	236

8.3.3	An Application of the Portfolio Model: The Impact of Capital Requirements	239
8.4	Appendix : Institutional Aspects of Credit Risk	244
8.4.1	Interest Rate and Rate of Return	244
8.4.2	Collateral	244
8.4.3	Endorsement and Insurance	245
8.4.4	Loan Covenants	246
8.4.5	Information Costs	246
8.4.6	Accounting	247
8.4.7	Bankruptcy	247
8.4.8	Fraud	249
8.5	Problems	249
8.5.1	The Model of Prisman, Slovin, and Sushka (1986)	249
8.5.2	The Risk Structure of Interest Rates (Adapted from Merton 1974)	250
8.5.3	Using the CAPM for Loan Pricing	251
8.6	Solutions	251
8.6.1	The Model of Prisman, Slovin, and Sushka	251
8.6.2	The Risk Structure of Interest Rates	253
8.6.3	Using the CAPM for Loan Pricing	254
	Notes	254
	References	255
9	The Regulation of Banks	257
9.1	Regulation Theory and Banking Theory	257
9.1.1	The Justification of Regulation	257
9.1.2	The Scope of Banking Regulation	258
9.1.3	Regulatory Instruments	258
9.2	Why Do Banks Need a Central Bank?	260
9.2.1	The Monopoly of Money Issuance	260
9.2.2	The Fragility of Banks	261
9.2.3	The Protection of Depositors	263
9.3	Portfolio Restrictions	265
9.4	Deposit Insurance	266
9.4.1	The Moral Hazard Issue	267
9.4.2	Risk-Related Insurance Premiums	268
9.4.3	Is Fairly Priced Deposit Insurance Possible?	270
9.4.4	The Effects of Deposit Insurance on the Banking Industry	271

9.5	Solvency Regulations	272
9.5.1	The Portfolio Approach	272
9.5.2	The Incentive Approach	274
9.5.3	The Incomplete Contract Approach	275
9.6	The Resolution of Bank Failures	279
9.6.1	Resolving Banks' Distress: Instruments and Policies	280
9.6.2	Who Should Decide on Banks' Closure?	281
9.6.3	Can Banks Be "Too Big to Fail"?	286
9.7	Complements	287
	Notes	288
	References	290
	Index	295
