

MATHEMATICS FOR ECONOMISTS

An introductory textbook

Malcolm Pemberton and Nicholas Rau
Department of Economics, University College London

Manchester University Press

Manchester and New York
Distributed exclusively in the USA by Palgrave

Contents

Preface	ix
1 LINEAR EQUATIONS	1
1.1 Straight line graphs	1
1.2 Simultaneous equations	9
1.3 Input-output analysis	15
Problems on Chapter 1	18
2 LINEAR INEQUALITIES	19
2.1 Inequalities	19
2.2 Economic applications	24
2.3 Linear programming	28
Problems on Chapter 2	33
3 SETS AND FUNCTIONS	35
3.1 Sets and numbers	35
3.2 Functions	41
3.3 Mappings	49
Problems on Chapter 3	50
4 QUADRATICS, INDICES AND LOGARITHMS	53
4.1 Quadratic functions	53
4.2 Indices	61
4.3 Logarithms	65
Problems on Chapter 4	68
5 SEQUENCES AND SERIES	69
5.1 Sequences	69
5.2 Series	74
5.3 Geometric progressions in economics	78
Problems on Chapter 5	84
6 INTRODUCTION TO DIFFERENTIATION	86
6.1 The derivative	87
6.2 Linear approximations and differentiability	91

6.3	Two useful rules	96
6.4	Derivatives in economics	99
	Problems on Chapter 6	102
	Appendix to Chapter 6	104
7	METHODS OF DIFFERENTIATION	107
7.1	The product and quotient rules	107
7.2	The composite function rule	110
7.3	Monotonic functions and inverse functions	113
	Problems on Chapter 7	117
	Appendix to Chapter 7	119
8	MAXIMA AND MINIMA	121
8.1	Critical points	121
8.2	The second derivative	126
8.3	Optimisation	130
8.4	Convexity and concavity	138
	Problems on Chapter 8	145
9	EXPONENTIAL AND LOGARITHMIC FUNCTIONS	147
9.1	The exponential function	147
9.2	Natural logarithms	153
9.3	Time in economics	157
	Problems on Chapter 9	160
	Appendix to Chapter 9	163
10	APPROXIMATIONS	165
10.1	Linear approximations	166
10.2	The mean value theorem	170
10.3	Higher derivatives and Taylor's theorem	174
10.4	Taylor series	177
	Problems on Chapter 10	180
	Appendix to Chapter 10	182
11	MATRIX ALGEBRA	184
11.1	Vectors	185
11.2	Matrices	189
11.3	Matrix multiplication	193
11.4	Square matrices	198
	Problems on Chapter 11	200
12	SYSTEMS OF LINEAR EQUATIONS	203
12.1	Echelon matrices	204
12.2	More on Gaussian elimination	207
12.3	Inverting a matrix	213

12.4 Linear dependence and rank	219
Problems on Chapter 12	222
13 DETERMINANTS AND QUADRATIC FORMS	224
13.1 Determinants	225
13.2 Transposition	230
13.3 Inner products and quadratic forms	235
Problems on Chapter 13	242
Appendix to Chapter 13	244
14 FUNCTIONS OF SEVERAL VARIABLES	245
14.1 Partial derivatives	245
14.2 Approximations and the chain rule	252
14.3 Production functions	257
14.4 Homogeneous functions	261
Problems on Chapter 14	266
Appendix to Chapter 14	268
15 IMPLICIT RELATIONS	271
15.1 Implicit differentiation	271
15.2 Comparative statics	279
15.3 Generalising to higher dimensions	285
Problems on Chapter 15	289
Appendix to Chapter 15	292
16 OPTIMISATION WITH SEVERAL VARIABLES	294
16.1 Critical points and their classification	294
16.2 Global optima, concavity and convexity	302
16.3 Non-negativity constraints	309
Problems on Chapter 16	313
Appendix to Chapter 16	315
17 PRINCIPLES OF CONSTRAINED OPTIMISATION	318
17.1 Lagrange multipliers	318
17.2 Extensions and warnings	325
17.3 Economic applications	329
17.4 Quasi-concave functions	338
Problems on Chapter 17	344
18 FURTHER TOPICS IN CONSTRAINED OPTIMISATION	347
18.1 The meaning of the multipliers	347
18.2 Envelope theorems	351
18.3 Inequality constraints	357
Problems on Chapter 18	367

19 INTEGRATION	370
19.1 Areas and integrals	370
19.2 Rules of integration	377
19.3 Integration in economics	384
19.4 Numerical integration	387
Problems on Chapter 19	394
Appendix to Chapter 19	396
20 ASPECTS OF INTEGRAL CALCULUS	398
20.1 Methods of integration	398
20.2 Infinite integrals	404
20.3 Differentiation under the integral sign	408
Problems on Chapter 20	413
21 INTRODUCTION TO DYNAMICS	415
21.1 Differential equations	416
21.2 Linear equations with constant coefficients	420
21.3 Harder first-order equations	426
21.4 Difference equations	432
Problems on Chapter 21	440
22 THE CIRCULAR FUNCTIONS	442
22.1 Cycles, circles and trigonometry	442
22.2 Extending the definitions	448
22.3 Calculus with circular functions	455
22.4 Polar coordinates	461
Problems on Chapter 22	463
23 COMPLEX NUMBERS	466
23.1 The complex number system	466
23.2 The trigonometric form	471
23.3 Complex exponentials and polynomials	475
Problems on Chapter 23	481
24 FURTHER DYNAMICS	483
24.1 Second-order differential equations	483
24.2 Qualitative behaviour	492
24.3 Second-order difference equations	499
Problems on Chapter 24	507
Appendix to Chapter 24	509

25 EIGENVALUES AND EIGENVECTORS	511
25.1 Diagonalisable matrices	511
25.2 The characteristic polynomial	516
25.3 Eigenvalues of symmetric matrices	524
Problems on Chapter 25	528
Appendix to Chapter 25	531
26 DYNAMIC SYSTEMS	533
26.1 Systems of difference equations	533
26.2 Systems of differential equations	541
26.3 Qualitative behaviour	546
26.4 Nonlinear systems	558
Problems on Chapter 26	565
Appendix to Chapter 26	568
Notes on Further Reading	570
Answers	572
Answers to odd-numbered exercises	572
Answers to selected problems	593
Index	607
