

High Inflation

The Arne Ryde Memorial Lectures

Daniel Heymann
and
Axel Leijonhufvud

CLARENDON PRESS · OXFORD

Contents

1. Introduction	1
<i>Overview</i>	3
2. Models of High Inflation	11
<i>The causes of inflation</i>	11
<i>The inflation tax</i>	14
<i>The government's budget constraint</i>	14
<i>Closing the model: from money to prices</i>	16
<i>Price expectations and money demand dynamics</i>	18
<i>Money demand and inflationary steady states</i>	18
<i>Expectational dynamics</i>	20
<i>The inflation tax and regular taxes</i>	24
<i>Government debts and the unpleasant arithmetic</i>	25
<i>Price inertia, relative price changes, and inflation</i>	28
<i>Fix-prices and flex-prices</i>	29
<i>Indexation, inflationary inertia, and the transmission of real shocks</i>	30
<i>'Bridge' models</i>	34
<i>A brief overview</i>	36
3. Monetary Regimes and Inflation	38
<i>Inflation and economic performance</i>	38
<i>Monetary regimes</i>	39
<i>Reliability</i>	42
<i>Anticipated inflation</i>	46
<i>Random walk monetary standards</i>	50
4. The Finances of the Government	55
<i>Fiscal inconsistencies and reliance on the inflation tax</i>	56

<i>The fiscal maze</i>	60
<i>Debt management and its problems</i>	63
<i>Public debt in high inflations</i>	63
<i>Debt and government incentives</i>	65
<i>Debt management under conditions of strong fiscal pressures</i>	67
<i>Ineffective tax systems</i>	69
<i>Expenditures: lack of structured budgeting procedures</i>	73
<i>Soft budgets</i>	75
<i>Inflation and the liberalization of plan-economies</i>	81
5. Living with High Inflation	84
<i>The effects of anticipated inflation</i>	84
<i>Inflation tax distortions</i>	84
<i>Incidence of the inflation tax</i>	88
<i>Liquidity constraints</i>	89
<i>Other effects</i>	90
<i>Information and the shortening of planning horizons</i>	91
<i>Contracting</i>	95
<i>Current transactions</i>	102
<i>Over the brink: 'closed for lack of prices'</i>	104
6. Stabilization: Finding a Way Back	109
<i>Disinflation and stabilization</i>	110
<i>Fiscal policies</i>	113
<i>Cash management and fiscal reform</i>	113
<i>Privatizations</i>	116
<i>Foreign debts, reparations</i>	117
<i>Monetary reform and monetary policies</i>	118
<i>Changing the rules</i>	118
<i>Dealing with a domestic debt overhang</i>	121
<i>Bluebacking in practice</i>	123

<i>Contents</i>	xi
<i>Price anchoring and short-run monetary policies</i>	125
<i>To float or to anchor</i>	125
<i>Incomes policies</i>	128
<i>Trade liberalization</i>	130
<i>Beyond disinflation—or back to high inflation</i>	132
<i>Inflation and stabilization in the former Soviet Union</i>	138
7. High Inflation and Contemporary Monetary Theory	143
<i>The ambivalence of monetary theory</i>	143
<i>Neoclassical monetary theory: traditional and modern</i>	145
<i>Three problems</i>	146
<i>The medium of exchange function</i>	147
<i>The adding-up problem</i>	150
<i>Bottoms up</i>	154
<i>Marshall's consumer</i>	156
<i>The disappearance of markets</i>	160
<i>Intertemporal co-ordination</i>	165
<i>Excess relative price variability</i>	169
<i>Turbulence on the exchanges</i>	178
<i>Money and the social construction of reality</i>	182
Appendix	189
<i>A1 The fiscal deficit and the money supply: a stylized description</i>	189
<i>A2 Simple models of the inflation tax</i>	191
<i>A2.1 Perfect foresight</i>	192
<i>A2.2 Adaptive expectations</i>	192
<i>A3 Monetary policies</i>	194
<i>A4 Inertia, relative prices, and wage-price spirals</i>	197
<i>A5 Mixed models: some examples</i>	199

<i>A5.1 Inflation and public sector prices with inertia and constant money velocity</i>	199
<i>A5.2 Money demand dynamics with price inertia and perfect foresight</i>	201
<i>A6 Fiscal inconsistencies and high inflation</i>	203
